ITR Asphalt Paver Parts

High Quality Repair Parts For Popular Asphalt Pavers From ITR

New Repair Parts for use on:
Roadtec®
Leeboy®
Cedarapids®
Blaw-Knox®
Barber-Greene®
Caterpillar®
Champion-Allat®
and More...

Screeds . Floor Plates . Conveyor Chains . Sprockets . Augers
Bearings . Flight Bars . Rubber Tracks . Rubber & Poly Pads . Track Components
Hardware . and other repair popular parts.

ITR manufacturers a wide range of repair parts for use on asphalt pavers. Precision manufactured from the highest quality materials to insure excellent field performance, ITR paver parts can reduce equipment maintence costs while providing extended component service life in tough working applications.

Warranty:
ITR Products are engineered to provide Superior Machine Performance in extreme working conditions and are fully covered by the ITR Product Warranty.

ITR Asphalt Paver Parts

ITR's high quality replacement parts for Pavers, are well known in the industry for an exact fit and providing long wear life in tough working applications. ITR parts are a perfect match for your equipment.

ITR SCREED PLATES are available for use on a wide range of asphalt pavers including the Carlson III & IV screed. Our screed plates are precision formed for a precise fit on your paver with a superior quality mat finish. ITR screed plates are produced from premium quality steels including Hardox 400, Hardox 500 and Chromium Carbide. ITR screed plates offer extended wear and long service life in extremely abrasive conditions.

ITR FLOOR PLATES are precisely cut, precision drilled and manufactured specifically for your paver. Produced from premium quality Hardox 400 and Hardox 500 alloy steels, these high quality components can reduce your maintenance costs and minimize downtime on your equipment. ITR high quality components provide superior wear characteristics and great service in very tough working conditions.

ITR offers a range of steel alloy materials for various paver screeds & floor plates, giving you an option to select the best material for your machine and paving conditions.

HARDOX 400: Our standard selected steel for Floor plate & Screed production. Hardox steel with hardness up through 430 Brinell is superior to lesser AR 400 materials that other suppliers provide. Our Hardox quality control insures consistent hardness and abrasion resistance with a minimum of distortion across the working surface of the Screed and Floor plates. Our premium Hardox steels perform better and last longer, and give better value in tough asphalt paver applications.

HARDOX 500: and CHROMIUM CARBIDE: ITR offers custom manufactured Screed & Floor plates from premium Hardox 500 and Chromium Carbide steels, available by special order. These harder more abrasive resistant materials are a perfect alternative for asphalt pavers used in very high production and extreme abrasive conditions where obtaining the maximum Screed and Floor plate service life and benefits of reduced maintenance are a primary consideration.

ITR SPROCKETS are precision forged, heat treated from high quality alloy steel and are precisely machined to obtain a matched conveyor chain fit. Sprocket teeth are induction hardened to the proper depth for extended wear life.

ITR CONVEYOR CHAINS are precision manufactured from high quality steel, properly heat treated for maximum strength and abrasion resistance. ITR roller chains offer superior chain strength and excellent service life in these tough working applications.

ITR AUGERS are cast and machined from premium white cast iron alloys, properly heat treated to achieve a 550 Brinell hardness range, to obtain high abrasion resistance and the right material strengths, for a superior quality, long lasting auger.

ITR RUBBER TRACKS are produced from the highest grade materials and specially constructed for strength and long service life in asphalt paver applications. ITR also offers RUBBER and POLYURETHANE pads and Steel Track undercarriage components.

ITR BEARINGS, HARDWARE and other REPAIR PARTS include Sealmaster Bearings and a broad range of popular parts used in the maintenance & repair of Asphalt Pavers.

Warranty:
ITR Products are engineered to provide Superior Machine Performance in extreme working conditions and are fully covered by the ITR Product Warranty.
