CAPITAL I INDUSTRIES

MOTOR GRADER ATTACHMENT

Postless Snow Wing

Designed and built by Capital I Industries. Sold by DMC Wear Parts.

Capital I's **patented postless design** removes the wing post, so the operator sees clearly in every wing position and the moldboard can angle all the way to the rear tire.

- **No post**
  Nothing blocks operator visibility in any wing position, and the moldboard angles fully to the rear tire.
- **4-position loose link**
  Upgraded pin assembly lets the wing float over obstacles and travel closer to the grader.
- **Adjustable blade angle**
  The extension cylinder lets the operator vary the blade angle.
- **Tilt control**
  Hydraulic blade tilt (optional) or manual blade control.
- **Stable in carry**
  A preloaded extension arm spring keeps the blade stable.
- **In-cab hydraulics**
  All hydraulics are controlled from inside the cab.
- **Options**
  2, 3 or 4 function, ripper mount, and rear hitch.

The Postless Snow Wing is designed, patented and manufactured by Capital I Industries, Tisdale, Saskatchewan, Canada. DMC Wear Parts is an independent reseller. Specifications and options are set by the manufacturer and may change; confirm details with your quote.

Postless Snow Wing Features

MANUFACTURED BY
CAPITAL I INDUSTRIES

12FT	30IN	40IN	32 / 54IN	32IN
CUTTING EDGE	INTAKE	DISCHARGE	BENCHING HEIGHT	FLOAT OVER OBSTACLES

01 Postless design

Patented postless design gives excellent operator visibility and safety, and lets the moldboard angle freely.

Loose link assembly lets the wing float over obstacles up to 32".

02 Angle and float

The extension cylinder lets the operator vary the blade angle.

Loose link pin assembly upgraded to a 4-position system, so the wing floats and travels closer to the grader.

Ripper mounting available.

03 Built heavy

Preloaded extension arm spring keeps the blade stable in carry position.

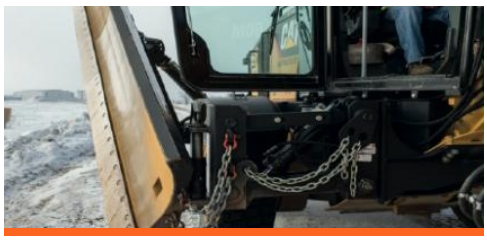

Heavily constructed blade with reinforcing ribs and heavy backing sheets for added durability.

The same mounts serve the wing, mower and gravel reclaimer.

04 Two benching heights

Wing available with a 32" or 54" benching height.

Unrestricted use of the cab door.

05 Blade and options

12' cutting edge, 30" intake and 40" discharge.

Optional rear extension arm.

Hydraulic blade tilt (optional) or manual blade control.
